Re: **Letter of Notice for Feedback on the Mothball Outage Reporting Rule Amendment: Design Document ("Design Document") for the Development of the Proposed Amended Section 306.7 of the ISO Rules, *Mothball Outage Reporting* ("Section 306.7")**

On November 4, 2021, the AESO issued the Mothball Outage Reporting Rule Amendment Options & Recommendations Paper ("Options & Recommendations Paper") for stakeholder feedback. The AESO has considered the feedback and has decided to move forward with Option 2, Alternative B from the Options & Recommendation Paper.

The AESO has developed the Design Document to outline the approach to implement Option 2, Alternative B and is seeking stakeholder feedback on the implementation considerations before moving to ISO rule development. The AESO will use this feedback to ensure that the draft rules, which it anticipates posting in Q3 2022, sufficiently reflect the design and accompanying processes.

Stakeholders are encouraged to submit written comments following their review of the Design Document, using the attached *Stakeholder Comment Matrix – Feedback on the Mothball Outage Reporting Rule Amendment: Design Document for the Development of the Proposed Amended Section 306.7 of the ISO Rules, Mothball Outage Reporting*.

Stakeholders should also ensure that comments provided represent all interests within their organization. The scope of comments is limited to the issues discussed in the Design Document. The AESO will not consider any comments that are outside of this scope.

The deadline for stakeholders to provide comments is **May 13, 2022** to rules_comments@aeso.ca. Adherence to deadlines is essential to the integrity of the comment process, and as such, the AESO may choose not to consider any stakeholder comments received after the deadline.

The AESO will post all stakeholder comments received on the AESO website.
