

# Cancellation application

Date: 2023-06-09

Company name (if applicable): **Alberta Electric System Operator**

## Needs identification document approval cancellation

### Cancellation application requirement (CT1)

**Provide the approval number to be cancelled and the rationale for the cancellation:**

The AESO requests the cancellation of Needs Identification Document Approval 21761-D02-2017, which includes:

- The construction of a new 144/25-kV substation, designated as the Hughes 2030S Substation.
- The construction of a double-circuit 144-kV transmission line 7L22/7L197 to connect the Hughes 2030S Substation to the existing 144-kV transmission line 7L22 using an in-and-out configuration.
- Other associated equipment as more particularly described in the application.

The AESO is requesting cancellation of the above noted NID approval because the associated request for system access service was cancelled at the request of the market participant, ATCO Electric Ltd. Therefore, there is no longer a need for the transmission facilities included in 21761-D02-2017.

## Transmission line, substation and other transmission facility cancellation

### Cancellation application requirement (CT2)

Provide the permit and licence number to be cancelled:

### Cancellation application requirement (CT3)

Provide the connection order number to be cancelled, if applicable:

### Cancellation application requirement (CT4)

Provide a letter from the independent system operator endorsing the cancellation. [Please submit along with your application].

### Cancellation application requirement (CT5)

Describe whether any work on the construction of the transmission line or substation has been started, and if so, describe the extent of the work:

### Cancellation application requirement (CT6)

If any work on the construction of the transmission line or substation has been started, describe how the site will be reclaimed:

### Cancellation application requirement (CT7)

Confirm that personal notification was provided to occupants, residents, landowners and any other utilities or stakeholders and Indigenous groups on or directly adjacent to the project right-of-way or location:
