

ISO Tariff – Rate DOS Demand Opportunity Service

Applicability

1 Rate DOS of the **ISO tariff, Demand Opportunity Service**, applies to **system access service** provided at a **point of delivery** to a **market participant** who:

- (a) receives **system access service** under Rate DTS of the **ISO tariff, Demand Transmission Service** at the **point of delivery**;
- (b) is eligible for demand opportunity service under section 9 of the **ISO tariff, Demand Opportunity Service**; and
- (c) is recallable in accordance with the provisions of this rate.

Metered Energy

2(1) The **ISO** must apply Rate DOS charge to **metered energy** received at a **point of delivery** in every hour:

- (a) for Rate DOS capacity dispatched by the **ISO** and used by the **market participant**;
- (b) above the Rate DTS **contract capacity** for the **system access service**; and
- (c) up to the sum of the Rate DTS **contract capacity** and the Rate DOS capacity for the **system access service**.

2(2) The **ISO** must add to the **market participant's metered energy** received at a **point of delivery** under Rate DTS any **metered energy** received at the **point of delivery** in an hour that exceeds the sum of the Rate DTS **contract capacity** and the Rate DOS capacity for the **system access service**, in the same **settlement period**.

Rate

3(1) The **ISO** must provide the two types of demand opportunity service in accordance with the charges, recall **directive** response times and recall priorities in the following table:

Rate DOS Type	Rate DOS Charge	Recall Directive Response Time	Recall Priority
(a) DOS Dispatchable	\$ 7.49 <u>24</u> /MWh	10 minutes	Before Rates DTS and FTS
(b) DOS Term	\$ 114.44 <u>115.15</u> /MWh	10 minutes	Before Rates DTS and FTS

ISO Tariff – Rate DOS
Demand Opportunity Service (continued)

3(2) The ISO must determine the amount charged or credited for demand opportunity service in a **settlement period** as:

- (a) the Rate DOS charge from subsection 3(1)(a), or (b) above, as applicable, multiplied by the **metered energy** during the **settlement period**; plus
- (b) an incremental losses charge or credit calculated as the sum, over all transaction hours in the **settlement period**, of **metered energy** in the hour multiplied by **pool price** in the hour multiplied by a **loss factor** for the facility, where the **loss factor** is determined in accordance with section 501.10 of the **ISO rules**, *Transmission Loss Factors*, which is available to **market participants** on the AESO website.

3(3) The ISO must determine the **operating reserve charge** as the sum, over all hours in the **settlement period** of the amount calculated in each hour as the product of:

- (a) **metered energy** for the Rate DOS **market participant** in the hour; and
- (b) the total cost of **operating reserves** in the hour divided by the total **metered energy** for all Rate DTS, Rate DOS and Rate FTS of the **ISO tariff market participants** in the hour.

3(4) The ISO must estimate the **operating reserve** charge, if unable to determine it for a **settlement period** in accordance with subsection 3(3) above, as the sum, over all hours in the **settlement period** of the amount calculated in each hour as the product of:

- (a) **metered energy** for the Rate DOS **market participant** in the hour; and
- (b) **pool price** in the hour multiplied by ~~5.486.87~~5.486.87%.

Terms

4(1) The ISO must apply Rate DOS separately at each **point of delivery**.

4(2) The **market participant** must, if the ISO recalls by **directive** or **dispatch** a **market participant's** demand opportunity service, curtail use by the amount directed by the ISO which:

- (a) may be an amount up to the Rate DOS capacity; and
- (b) must not require curtailment below the **market participant's** Rate DTS **contract capacity** for the **system access service**.

4(3) The **market participant** must, in response to a **directive** or **dispatch** from the ISO, achieve curtailment of its demand opportunity service load within 10 minutes.

4(4) The ISO must apply Rider E of the **ISO tariff**, *Losses Calibration Factor Rider*, to **system access service** provided under this rate.

4(5) The ISO must apply Rider F of the **ISO tariff**, *Balancing Pool Consumer Allocation Rider*, to **system access service** provided under this rate, with the exception of the City of Medicine Hat.

4(6) The terms and conditions of the ISO tariff form part of this rate.
