

## Stakeholder Comment Matrix – April 23, 2020

Overview of Energy Storage Resources – Operating Reserves Qualification and Technical Requirements and Alberta Reliability Standards Applicability

**Period of Comment:** April 23, 2020 through May 7, 2020  
**Comments From:** Greengate Power Corporation  
**Date:** 2020/05/07

**Contact:** [REDACTED]  
**Phone:** [REDACTED]  
**Email:** [REDACTED]

### Instructions:

1. Please fill out the section above as indicated.
2. Please respond to the questions below and provide your specific comments.
3. Email your completed comment matrix to [energystorage@aeso.ca](mailto:energystorage@aeso.ca) by **May 7, 2020**.

**The AESO is seeking comments from Stakeholders with regard to the following matters:**

	Questions	Stakeholder Comments
1.	Are there areas where further clarity on expected participation in the Operating Reserves (OR) market or applicability of the Alberta Reliability Standards (ARS) would be helpful?	Will the AESO threshold for AGF's be subject to change? Is the 67.5 MW limit likely to remain in place for the applicability of reliability standards for ESR's?
2.	Are there areas of market participation or compliance with standards that in your view need special consideration for energy storage that are not identified in the qualification and ARS applicability document?	Is the AESO considering new forms of Ancillary services such as a quick ramp product that may be well suited for ERS's?
3.	Additional comments	The AS document provided a good oversight. Thank you for the opportunity to provide feedback.

Thank you for your input. Please email your comments to: [energystorage@aeso.ca](mailto:energystorage@aeso.ca).
