

## Stakeholder Comment Matrix – April 9, 2020

Overview of Short-term Market Implementation Requirements for Energy Storage Participation

<b>Period of Comment:</b> April 9, 2020 through April 27, 2020 <b>Comments From:</b> TERIC Power <b>Date:</b> 2020/04/24	<b>Contact:</b> [REDACTED] <b>Phone:</b> [REDACTED] <b>Email:</b> [REDACTED]
--	--

**Instructions:**

1. Please fill out the section above as indicated.
2. Please respond to the questions below and provide your specific comments.
3. Email your completed comment matrix to [energystorage@aeso.ca](mailto:energystorage@aeso.ca) by April 27, 2020.

**The AESO is seeking comments from Stakeholders with regard to the following matters:**

	Questions	Stakeholder Comments
1.	Are there areas where further clarity on expected participation would be helpful?	<p>- If there are significant changes to energy storage participation from the short term phase to the long term implementation, will initial projects be grandfathered on certain aspects within the Authoritative Document or vice versa (if the long-term rules make more sense or are more inclusive etc.)?</p> <p>- Would like more information on the proposed concepts of the changes to the Tariff change for battery storage (section 7.1 Rate DTS).</p> <p>- Further, what is the expected interim treatment of storage assets from a tariff perspective? As initial projects will potentially online prior to the completion of the Bulk and Regional Tariff Design engagement is completed.</p>
2.	Are there areas of market participation that in your view need special consideration for energy storage that are not identified in the overview document?	<p>- Are energy storage assets able to provide Standby Reserves? Should this be stated explicitly in the participation documents?</p> <p>- Energy storage is treated as a SUPG product in Supplemental Reserves. Does this preclude an asset from participating during charging (sink) periods (SUPL)?</p>

3.	Additional comments	<i>None.</i>
