The AESO is seeking comments from Stakeholders on the development of proposed new ISO Rule – Section 502.11, *Substation Technical and Operating Requirements* with regard to the following matters:

	Development of a Proposed ISO Rule	Stakeholder Comments and/or Alternate Proposal
1.	Do you agree or disagree that the issue identified requires the development of proposed new ISO Rule – Section 502.11, <i>Substation Technical and Operating Requirements</i> ? Please comment.	Agree – AltaLink supports development of a Substation Technical and Operating Requirements rule.
2.	Do you agree or disagree with the potential objective or purpose of proposed new ISO Rule – Section 502.11, <i>Substation Technical and Operating Requirements</i> ? Please comment.	<i>Agree – AltaLink believes that defining the minimum technical requirements for substations will be a benefit to the Alberta Interconnected Electric System with clear direction on new facilities while allowing for flexibility at legacy installations.</i>
3.	Do you agree or disagree with the proposed form of consultation and timelines? Please comment.	<i>Disagree – Although AltaLink would likely be able to provide comments within the two weeks set aside for consultation, AltaLink is concerned that this timeline may potentially restrict valuable input into the process from other stakeholders which we believe is vital for important rules such as this one. AltaLink respectfully requests that the consultation timeline be extended by at least 2 weeks for a total of at least 4 weeks to prepare and submit comments.</i>
4.	Do you intend to participate in any related consultation? OR Do you agree that no consultation group is required for this rule development? Please comment.	<i>AltaLink intends to participate.</i>

5.	Do you have any additional comments?	<i>AltaLink looks forward to supporting the AESO in the finalization of a Substation rule for Alberta.</i>
