Attention: Doug Walker, PMP, Project Manager Transmission Projects

Re: AESO Request Letter dated October 12 2015 and AUC Rule 007 – Section 6.2.2, NID23(3) & NID24

Power Renewable Energy Corporation (PRE), as the succeeding owner to Joss Wind Power Inc. (Joss) of the Jenner MPC WAGF - Project #1533, hereby responds to the AESO with respect to item 4 (i) a. of the AESO Request Letter dated October 12, 2015 referring to the then enacted Alberta Utilities Commission (AUC) Rule 007 Section 6.1, NID13.

PRE notes that AUC Rule 007 has since been revised and made effective February 1, 2016. PRE understands that for system access service by generators and in particular for the Jenner MPC WAGF – Project #1533 the information requirements related to the AESO's Request Letter now relate to Section 6.2.2 of AUC Rule 007.

In this context, PRE confirms that PRE's transmission facility application, to be titled *Transmission Line 949L and Interconnection Application for the Jenner Wind Power Project*, will address the requirements of AUC Rule 007, Section 6.2.2, NID23(3) in its responses to AUC Rule 007, Section 7.1, TS10, and AUC Rule 007, Section 7.1.1, TS39 and TS40.

Further, PRE's transmission facility application will address the requirements of AUC Rule 007, Section 6.2.2, NID24 in its response to AUC Rule 007, Section 7.1.1, TS43.

PRE trusts this confirmation is satisfactory for the purpose of preparing the AESO's needs identification document relating to Project #1533.

Yours truly,

Jeff Jenner,

Chief Executive Officer

Power Renewable Energy Corporation
