Re: Late Stakeholder Comments on Letter of Notice to Develop – Proposed New Section 502.10 of the ISO rules, *Revenue Metering Technical Requirements* ("Section 502.10")

On August 20, 2019, the Alberta Electric System Operator ("AESO") received late written comments on proposed new Section 502.10 from Rodan Energy Solutions Corp.

In accordance with subsection 5.2 of AUC Rule 017, *Procedures and Process for Development of ISO Rules and Filing of ISO Rules with the Alberta Utilities Commission* ("AUC Rule 017"), the comments have been posted to the AESO website. The following is hyperlinked to provide assistance in directing stakeholders to these written comments.

Section 502.10
Rodan Energy Solutions Corp. Cover Letter Rodan Energy Solutions Corp. Appendix

The AESO expects to issue an updated draft of proposed new Section 502.10 at the beginning of Q4 2019 for consultation. In accordance with subsection 6 of AUC Rule 017, stakeholders will have the opportunity to provide submissions on the updated rule after it is issued.

The AESO is of the view that adherence to deadlines is an integral part of a fair and efficient ISO rules comment process. Stakeholder comments received after a specified deadline are considered at the AESO's discretion.

Sincerely,

Alison Desmarais
