

Notification of Needs Identification Document Filing Addressing the Need for the Claresholm Solar Project Connection in the Claresholm Area

The Alberta Electric System Operator (AESO) advises you that it intends to file a Needs Identification Document (NID) for the Claresholm Solar Project Connection with the Alberta Utilities Commission (AUC) on or after June 26, 2019.

Claresholm Solar Inc. (Claresholm Solar) has applied to the AESO for transmission system access to connect its approved Claresholm Solar Project (Facility) in the Claresholm area. Claresholm Solar's request can be met by the following solution:

- Add one 138 kilovolt (kV) transmission line to connect the Facility to the existing 138 kV transmission line 180L.
- Add or modify associated equipment as required for the above transmission developments.

The shaded area on the map indicates the approximate location of the proposed transmission developments, including the 138 kV transmission line. The specific transmission facilities may extend beyond the shaded area shown.

AltaLink Management Ltd. is the transmission facility owner (TFO) in the Claresholm area. In May 2018, the AESO and the TFO began presenting this need to stakeholders, including residents, occupants, and landowners. The AESO will apply to the AUC for approval of the need for this transmission development. Once filed with the AUC, the NID will be posted on the AESO website at <https://www.aeso.ca/grid/projects/claresholm-solar-project-connection/>

In a separate application, called a Facility Application, the TFO will provide more details about the specific facilities associated with the AESO's proposed transmission development, and will request AUC approval to construct and operate these facilities.
