Re: **Notice of information session on the AESO tariff design for allocating costs for the capacity market and for bulk and regional transmission**

The AESO invites stakeholders to an information session where it will provide an update on the ISO tariff development for allocating costs of the capacity market and of bulk and regional transmission.

Date: Wednesday, March 13, 2019

Time: 9:00 a.m. to 12:00 p.m.

Place: The Westin Calgary, 320 4th Avenue, SW (Eau Claire Room)

Registration: Please RSVP by noon on March 12, 2019

In-person attendance: tariffdesign@aeso.ca

Webinar: <https://attendee.gotowebinar.com/register/8939466436910975499>

During the session, the AESO will summarize discussions and conclusions reached in the AESO's stakeholder consultation process to date and will present its view of how the costs of the capacity market should be allocated to loads, exports, and transmission losses using the weighted energy method as prescribed by legislation. The AESO will also present the time blocks, weights and preliminary terms and conditions developed through working groups in the stakeholder engagement process. Participants will have opportunities throughout the session to ask clarifying questions about the information presented.

Following the session, the AESO will provide an opportunity for written feedback on the content presented. The deadline for written feedback will be April 3, 2019. The AESO will post all feedback "as received" on www.aeso.ca and the names of the parties submitting feedback will be included in this posting. The AESO will consider this feedback in developing the ISO tariff application required for the approval to allocate the costs of the capacity market and in relation to our continuing work on tariff design for allocating bulk and regional transmission costs.

For more information about the AESO's consultation on the tariff design for allocating the costs of the capacity market and of bulk and regional transmission, please visit the AESO's website at www.aeso.ca and follow this path: *Rules, Standards and Tariff* → *Stakeholder Engagement* → [ISO Tariff Design for Allocating Costs of Capacity Procurement and Bulk and Regional Transmission](#).

In accordance with its mandate to operate in the public interest, the Alberta Electric System Operator (AESO) will be audio and video recording this session and making the transcribed minutes available to the general public at www.aeso.ca. Video recording will be limited to shared screen presentation slides. The accessibility of these discussions is important to ensure the openness and transparency of this AESO process, and to facilitate the participation of stakeholders. Participation in this session is completely voluntary and subject to the terms of this notice.

Public

The collection of personal information being collected by the AESO will be used for the purpose of capturing market participant input for the development of a proposed new Waivers and Variances ISO Rule. This information is collected in accordance with Section 33(c) of the *Freedom of Information and Protection of Privacy Act*. If you have any questions or concerns regarding how your information will be handled, please contact the Director, Information and Governance Services, 2500, 330 – 5th Ave SW, Calgary, Alberta, T2P 0L4 or by telephone at 403-539-2528.

Yours truly,

Doyle Sullivan
Director, Tariff Design
