Re: Notice of Consultation on ISO Tariff Design for Allocating Costs for Capacity Procurement and Bulk and Regional Transmission

The Alberta Electric System Operator (AESO) is providing notice of a consultation session regarding the ISO tariff design for allocating capacity procurement costs and bulk and regional transmission system costs. The AESO will host the session in Calgary on August 8, 2018, from 9:00 am to 12:00 pm at the Sheraton Eau Claire - Wildrose Ballroom North. A conference line will be set up to accommodate stakeholders who wish to participate in this session remotely.

The purpose of this session is to provide an overview of the AESO's consultation approach and to review a draft terms of reference (ToR) and gather feedback on this document. The draft ToR will be published in advance of the session on August 1, 2018. The AESO will aim to publish a final version of the ToR by the end of August. A second session, anticipated for later in August, will be scheduled to review a proposed work plan for this consultation. An invitation for this session will be posted on www.aeso.ca as soon as details are finalized.

If you intend to participate in the August 8 session please notify the AESO by email to ISOTariffnotice@aesO.ca on or before August 3, 2018. Parties should indicate whether they plan to participate in person or remotely in their response. Those parties attending remotely will be sent conference call information directly. A detailed agenda and any related materials for the consultation session will be published on www.aeso.ca on or before August 1, 2018.

Yours truly,

Doyle Sullivan
Director, Tariff Design
