

Cancellation of the Armitage 949S Substation in the Hanna area

The ATCO Electric Ltd. request for transmission system access to serve an industrial load in the Hanna area has been cancelled.

BACKGROUND

The Alberta Utilities Commission (Commission) originally approved the AESO's *Armitage 949S and Transmission Line Needs Identification Document* (NID) on September 12, 2011. The NID approval included the following transmission developments:

- Add the proposed Armitage 949S substation, including one 144/6.9 kilovolt (kV) transformer and one 144 kV circuit breaker.
- Add one 144 kV transmission line to connect the Armitage 949S substation to the existing Lanfine 959S substation in a radial configuration.
- Add or modify associated equipment as required for the above transmission developments.

NEXT STEPS

The AESO intends to apply to the Commission for cancellation of the NID approval in late 2021.

Information related to the Armitage 949S substation project is available on the AESO's website at <https://www.aeso.ca/grid/projects/>

WHO IS THE AESO?

The Alberta Electric System Operator (AESO) plans and operates Alberta's electricity grid and wholesale electricity market safely, reliably and in the public interest of all Albertans. We are a not-for-profit organization with no financial interest or investment of any kind in the power industry.

We appreciate your views, both on the need for transmission system development and proposed transmission plans. If you have any questions or comments, please contact us directly.
