

Notification of Needs Identification Document Filing Addressing the Need for the Dunmore Solar Power Project Connection in the Dunmore Area

The Alberta Electric System Operator (AESO) advises you that it intends to file a Needs Identification Document (NID) for the Dunmore Solar Power Project with the Alberta Utilities Commission (AUC) on or after October 22, 2021.

Dunmore Solar Inc. (Dunmore) has applied to the AESO for transmission system access to connect its approved Dunmore Solar Power Project (Facility) in the Dunmore area. Dunmore's request can be met by the following solution:

- Add one 138 kilovolt (kV) transmission line to connect the Facility to the existing 138 kV transmission line 676L in a T-tap configuration.
- Add or modify associated equipment as required for the above transmission developments.

The grey shaded area on the map indicates the approximate location of the proposed transmission developments, including the 138 kV transmission line. The specific transmission facilities may extend beyond the grey shaded area shown.

AltaLink Management Ltd. is the transmission facility owner (TFO) in the Dunmore area. In June 2021, the AESO and the TFO began presenting this need to stakeholders, including residents, occupants, and landowners. The AESO will apply to the AUC for approval of the need for this transmission development.

Once filed with the AUC, the NID will be posted on the AESO website at <https://www.aeso.ca/grid/projects/dunmore-solar-power-project-connection/>

In a separate application, called a Facility Application, the TFO will provide more details about the specific facilities associated with the AESO's proposed transmission development, and will request AUC approval to construct and operate these facilities.
