Calibration Factor Calculation Outputs: Rider E Calibration Factor Q2 2016 **0.40%** (Refund)/Charge

Notes:

- The Rider E Calibration Factor will apply to all loss factor customers receiving service under Rates STS, DOS, XOS, and IOS as provided on the Rider E rate sheet.
- If the Rider E Calibration Factor for Q2 remained in place during Q2, Q3, Q4, it would collect the variance between cost of losses and revenues by the end of 2016, as currently forecasted.
- Forecast amounts in the above table and calculation reflect the AESO's best estimates at the time of preparation. The values represent forecasts and estimates only, and final values will differ.
- Actual amounts in the above table are subject to revision in future periods due to interim and final settlement and to other adjustments.
- The calibration factor calculation itself is based on summing hourly costs, revenues, and loss factor customer volumes x pool price, and the same result will not be obtained by using the monthly values presented.
- Numbers may not add due to rounding.
- "NA" means "not applicable".
- The revenue, cost and Rider E amounts are shown on a production month basis.
- The 2016 Q2 Calibration Factor reflects a charge of \$3.23 million arising from a system level metering adjustment related from December 2008 to May 2015. The allocation of the charge will occur over April to December of 2016, consistent with the existing methodology which allocates outstanding variance amounts over the remaining months in the calendar year.
