

**AESO Discussion Paper – Intertie Restoration Initiative**  
**Stakeholder Comment Matrix**  
**Response of: The Alberta Direct Connect Consumer Association (ADC)**  
**Contact: Colette Kearl, Executive Director: Colette@carmal.ca**

| Section                                   | Subsection   | Stakeholder Response   |
|---|--|--|
| <b>2.0 Intertie Restoration Policy</b>    | <b>2.1 Obligation to Restore Capacity</b>  | The ADC agrees that intertie capacity should be restored.  |
|   | <b>2.2 Cost Allocation</b><br>a. <b>Transmission Development Policy</b><br>b. <b>Import restoration cost allocation</b><br>c. <b>Export restoration cost allocation</b><br>d. <b>Variable cost flow through?</b> | The ADC believes that the fixed cost of the import service should be allocated to load and any variable component allocated to importers that are using the service.<br>The cost for export restoration should be borne by the exporter as they directly benefit from the service. |
| <b>3.3 Options to Increase Import ATC</b> | <b>3.3 Options</b><br>a. <b>LSSi to be pursued</b><br>b. <b>ILRAS not an option at this time</b><br>c. <b>Service available for in market use as opposed to emergency use only?</b><br>d. <b>Others?</b>         | The ADC agrees that the LSSi service should be procured for in market use.<br>The pricing mechanism, arming requirement, and telemetry requirements will be key to getting load interested in participating.   |
|   | <b>3.4 Next Steps</b><br>a. <b>Form working group</b>  | The ADC requests to be a member of the import restoration working group as our members have the most experience with the LSS product.  |
