

THE POWER OF POSSIBILITY

February 9, 2005

Dear Stakeholders:

Re: Transmission Loss Factor Methodology

Consistent with AESO's commitment to deliver the Rules Discussion Draft paper and the draft notes for the January 28 2005 Loss Factor meeting, please review the attachments. The first two section of the Transmission Loss Factor Methodology Discussion Paper describe issues which have already received extensive stakeholder input. The AESO is seeking input on Section three, four and Appendix A in particular. Your comments on these Sections would be most helpful. The loss factors for 2010 and for opportunity import export service should be available later this week. The AESO will forward this information as soon as it is available.

In order to facilitate our aggressive timeline to completing the Rules and ultimately the project, please return comments by Feb 18 2005. AESO will hold the next meeting on the 2006 Loss Factor process on Feb 24,2005 with details to follow. AESO offers a session similar to the Jan 28th meeting, and a special focus on the Rules document will occur. The items attached will also be posted in the weekly AESO stakeholder correspondence.

Please contact Rob Baker (rob.baker@aeso.ca, 403 539 2614) or Wayne Poole (216 2140 Ext. 263) if you have any questions.

Sincerely,

Robert Baker, P.Eng.
