Calibration Factor Calculation Outputs: Rider E Calibration Factor Q4 2012							(0.55%)	(Refund)/Charge		

Notes:

- The Rider E Calibration Factor will apply to all loss factor customers receiving service under Rates STS, DOS, XOS, and IOS as provided on the Rider E rate sheet.
- If the Rider E Calibration Factor for Q4 remained in place during Q4, it would collect the variance between cost of losses and revenues by the end of 2012, as currently forecasted.
- Forecast amounts in the above table and calculation reflect the AESO's best estimates at the time of preparation. The values represent forecasts and estimates only, and final values will differ.
- Actual amounts in the above table are subject to revision in future periods due to interim and final settlement and to other adjustments.
- The calibration factor calculation itself is based on summing hourly costs, revenues, and loss factor customer volumes x pool price, and the same result will not be obtained by using the monthly values presented.
- Numbers may not add due to rounding.
- "NA" means "not applicable".
- The revenue, cost and Rider E amounts are shown on a production month basis.
- The following system level metering adjustments have occurred in 2012 and have been incorporated into Rider E consistent with the methodology pertaining to the allocation of outstanding variances.
 - a refund of \$5.4 million related to January to August 2011 allocated over Q1 to Q4 in 2012 (first incorporated into Rider E in Q1),
 - a refund of \$0.5 million related to December 2009 to December 2010 allocated over Q2 to Q4 in 2012, and
 - a refund of \$4.1 million related to December 2010 to October 2011 allocated over Q2 to Q4 in 2012.
